TASK ID	TASK NAME	JULY					AUGUST					SEPTEMBER					OCTOBER				
1	Project Setup & Planning																				
2	Requirement Gathering																				
3	Feasibility Study																				
4	Scope Definition & SRS Document																				
5	High-Level Architecture Design																				
6	Database Schema Design																				
7	Tech Stack Finalization (Angular, Node.js, MongoDB)																				
8	UI/UX Wireframe Design																				
9	Create Angular Frontend Project																				
10	Create Express + MongoDB Backend																				
11	Student Registration & Login Module																				
12	Profile Management (Student)																				
13	Resume Upload Feature																				
14	Company Registration & Login																				
15	Job Posting & Management																				
16	Student Apply for Job Functionality																				
17	Duplicate Application Handling																				
18	View Companies Page																				
19	Admin Dashboard Setup																				
20	CRUD for Students (Admin)																				
21	CRUD for Companies (Admin)																				
22	Recruiter Dashboard Setup																				
23	View Student Details (Recruiter)																				
24	Resume Viewer Integration																				
25	Placement Result Module																				
26	Company Notifications to Students																				
27	Performance Tracking & Result Commit																				
28	Unauthorized Access Handling																				
29	Validation & Error Handling																				
30	Password Encryption Integration																				
31	UI Enhancement (Styling, Responsiveness)																				
32	Integration Testing (Frontend–Backend)																				
33	Unit Testing (All Modules)																				
34	Final Performance																				
35	Final Deployment																				
36	Maintenance and Final Feedback
